AN EXCELLENT REPAIR OPTION FOR LIGAMENT PROCEDURES

JRF Ortho provides everything the surgeons want for their tendon needs

**Covers all procedures**
- Knee
- Shoulder
- Foot / Ankle
- Elbow

**All the graft options**
- Soft tissue allografts
- Pre-shaped
- Bone-tendon-bone
- Small joint

**What JRF Ortho Tendons are available?**
See the latest variety of allograft tendons and ligaments, readily available below.

**Advantages of allograft tendons**
- Requires less surgical time
- Allows the patient to avoid donor site morbidity
- Smaller incisions
- Availability of larger grafts
- Early post-operative discomfort and pain is minimized

SAFETY, TISSUE INTEGRITY & STERILIZATION

ADVANCED CLEANSING TECHNOLOGIES
CLEANSE WHILE PRESERVING TISSUE INTEGRITY

Tissue integrity is maintained with consistent processing, monitored temperature and limited reagent exposure.

Our processors’ use a proprietary bioburden reduction step that removes blood and lipids.

TERMINAL STERILIZATION WITHOUT COMPROMISING TISSUE PERFORMANCE

Recent studies show ultra-low dose, low-temperature irradiation does not impact the integrity of tissue and post-transplant failure rates.\(^1,2\)

JRF Ortho distributes ultra-low dose (9.5–15 kGy), low-temperature irradiated tendons that are used to obtain a Sterility Assurance Level (SAL) of 10\(^{-6}\).

Our processors are pioneers in ultra-low dose radiation sterilization for allograft tissue.\(^3\)

MAXIMIZING SAFETY WHILE PROVIDING QUALITY TENDONS

Working in a controlled environment with patented processes and ultra-low dose, low-temperature sterilization, our processors’ skilled technicians deliver safe, high quality tendons.

Utilizing highly sensitive NAT testing, has resulted in no confirmed incidence of disease transmission.
