

# ALLOGRAFTS FOR JOINT REPAIR

## HISTORY:

JRF Ortho has been recognized for their unequalled standard of customer care and for creating progressive solutions. As the largest provider of specialized orthopedic allografts furnishing surgeons with exceptional products, **JRF Ortho is the quality standard that you can depend on.**

## RELATIONSHIP:

Strong partnerships enable JRF Ortho to better supply surgeons with the highest viable and most widely available cartilage in the industry. Our allografts are processed by AlloSource® and Community Tissue Services® with local support and instrumentation provided by Arthrex®.

## WHY JRF ORTHO:

JRF Ortho is the industry leader who focuses on:

- ▶ **Exceptional product quality and safety**
  - Over 18,000 fresh osteochondral & meniscal allografts have been implanted without disease transmission.
- ▶ **Innovative solutions**
  - JRF Ortho works with orthopedic surgeons to develop novel techniques for allograft joint repair.
- ▶ **Superior customer care**
  - An independent survey found that JRF Ortho embodies the values of trust, respect, appreciation and integrity. Our customers are proud to be working with JRF Ortho and have a passion for accomplishing the joint mission.

**JRF Ortho is redefining the standard for allograft joint repair.**

## PRODUCTS:

By delivering fresh osteochondral allografts (OCA) with the highest viability and offering a complete selection of presutured, sterile, and non-irradiated tendons, JRF Ortho offers surgeons world-class allografts to improve their patients' standard of life.

## ADVANTAGES:

- ▶ Gold standard for cartilage restoration
- ▶ Fastest OCA matching due to online ordering and largest supply of grafts
- ▶ Proprietary processing methods shown to maintain 80% absolute cartilage viability<sup>1</sup>
- ▶ Increased efficiency in the OR with presutured tendon constructs
- ▶ Non-irradiated and ultra low dose sterilized tendons
- ▶ Preshaped fresh, viable cores provide optimal solutions for small, focal OCA defects
- ▶ Specialized instrumentation to make implantation easier, such as the Arthrex BioUni® OATS® Instruments.

*Our mission is to improve quality of life through innovative solutions for allograft joint repair.*

FRESH OCA CORES

PRESUTURED TENDONS

DISTAL TIBIA

# PRODUCTS OVERVIEW

## Osteochondral Allografts

Osteochondral allografts (OCA) allow surgeons to transplant mature hyaline cartilage with viable chondrocytes and subchondral bone in an intact unit.

**With a long track record of success, fresh Osteochondral Allografts are the Gold Standard for cartilage restoration.**

These grafts often are used to treat focal cartilage defects and offer long-term repair for a patient's damaged hyaline cartilage and underlying bone. Fresh OCA are used in innovative procedures, such as reconstructing the glenoid with distal tibia or repairing oval condyle defects using the BioUni® OATS® technique.

Readily available preshaped fresh OCA Cores are the optimal solution for small, focal osteochondral defects. The Cores contain a mature, viable hyaline cartilage matrix with bone for superior biomechanical and durable repair of defects without donor site morbidity.

## Meniscus

Meniscal transplantation is a surgical technique designed to restore the biomechanics of a meniscus deficient knee. Meniscal allograft transplantation provides improvement in regard to pain and level of function for daily activities.

## Presutured Tendons

Presutured tendon constructs are sterile and preassembled with Arthrex FiberWire® or FiberLoop® for speed, quality, and convenience in the OR. Each tendon is assembled according to Arthrex specifications by trained technicians, ensuring that the presutured tendon meets the requirements of the procedure and allows for anatomic, minimally invasive, and reproducible knee reconstruction.

### JRF ORTHO OFFERS:

- ▶ JRF GraftLink® XL
- ▶ JRF VersaGraft®
- ▶ JRF SpeedGraft®

## Nonsutured Tendons

JRF Ortho provides both non-irradiated and sterile tendon options offering excellent repair options for any ligament procedure. By not harvesting autografts, valuable OR time is optimized reducing costs and affording a proven solution to surgeons and their patients.

\* BioUni® OATS®, FiberWire®, FiberLoop®, SpeedGraft®, GraftLink®, VersaGraft® are registered trademarks of Arthrex, Inc.

1. Data on file, JRF Ortho

Independent research revealed that *customers feel JRF Ortho excels in timely fulfillment of fresh allograft orders, rating them a 9.6 out of 10.*
