

Speed. Convenience.

PRESUTURED TENDONS

the Way They Should be.

Presutured tendons are sterile and preassembled with Arthrex® sutures for speed and convenience. Each tendon is assembled according to Arthrex specifications, by trained technicians, ensuring that the presutured tendon meets the requirements of the procedure to allow for anatomic, *minimally invasive*, and reproducible reconstruction.

JRF ORTHO EXCLUSIVELY OFFERS A NUMBER OF PRESUTURED TENDONS

SpeedGraft® Tendon

Length: 175–295 mm
Diameter: 8–11 mm, with half sizes doubled over

Preassembled with Arthrex #2 FiberLoop Suture on one end and Arthrex #2 TigerLoop® Suture on the other end

COMMON PROCEDURES FOR USE:

ACL and PCL reconstruction using Arthrex ACL TightRope RT Suture or similar fixation technique, AC Joint repair

SpeedGraft® Achilles Tendon

Length: Total construct length 78–113 mm
Diameter: 10 mm Preshaped bone

Preassembled with Arthrex #2 Fiber Loop suture

COMMON PROCEDURES FOR USE:

ACL/PCL reconstructions implanted with interference screw or all-inside technique

PilotGraft BTB Tendon

Length: Intra-articular length (IAL) 25mm–45mm
Diameter: 10mm Preshaped bone

Preassembled passing sutures with Arthrex #2 FiberLoop® Suture loop on both bony ends

COMMON PROCEDURES FOR USE:

ACL reconstruction

VersaGraft® Tendon

Length: 150 mm–250 mm
Diameter: 4.5 mm +/- 0.5 mm

Preassembled using Arthrex #2 FiberLoop Suture

COMMON PROCEDURES FOR USE:

MPFL, AC Joint Repair, Lateral Ankle Reconstruction, ALL ligament repair

VersaGraft® 3.5 Tendon

Length: 190–240 mm
Diameter: Sutured ends 3.0 mm–3.5 mm

Preassembled using #0 FiberLoop Suture

COMMON PROCEDURES FOR USE:

MPFL, AC Joint Repair, Lateral Ankle Reconstruction, ALL ligament repair

GraftLink® XL Tendon

Length: 77 mm–95 mm
Diameter: 8.0–12.5 mm, with half sizes (four stranded)

Preassembled with Arthrex #2 FiberWire® Suture

COMMON PROCEDURES FOR USE:

All-inside® ACL/PCL reconstruction using Arthrex BTB TightRope® Suture and Open TightRope ABS Suture

ADVANTAGES OF NEXT GENERATION PRESUTURED TENDONS

OR time and cost savings

- ▶ No autograft recovery ▶ No construct assembly

Consistent quality graft

- ▶ Precision suturing method performed after patented cleansing method = consistent and accurate sizing while maintaining suture integrity with no variability

SAFETY, TISSUE INTEGRITY & STERILIZATION

ADVANCED CLEANSING TECHNOLOGIES CLEANSE WHILE PRESERVING TISSUE INTEGRITY

Tissue integrity is maintained with consistent processing, monitored temperature and limited reagent exposure.

► *Our processors use a proprietary bioburden reduction step that removes blood and lipids.*

TERMINAL STERILIZATION WITHOUT COMPROMISING TISSUE PERFORMANCE

Recent studies show low dose, low-temperature irradiation does not impact the integrity of tissue and post-transplant failure rates.^{1,2}

JRF Ortho Tendons have a Sterility Assurance Level (SAL) of 10^{-6} , obtained by using low dose, low temperature irradiation.

► *Our processors are pioneers in low dose irradiation sterilization for allograft tissue.³*

MAXIMIZING SAFETY WHILE PROVIDING QUALITY TENDONS

Working in a controlled environment with patented processes and low dose, low-temperature sterilization, our processors' skilled technicians deliver safe, high quality tendons.

► *Utilizing highly sensitive NAT testing has resulted in no confirmed incidence of disease transmission.*

REGULATORY COMPLIANCE

- ✓ FDA
- ✓ AATB
- ✓ CLIA
- ✓ ISO
